http_server

A HTTP server is waiting for a connection...

Client

Waiting for a connection

http_server

Connect to http_server

Waiting for a connection

Client

http_server

Connect to http_server

Accept, create socket

Client

socket

http_server

Sending content

Accept, create socket

Client

HTTP request

socket

http_server

E.g., URI =

<http://nplinux1.cs.nctu.edu.tw/~tzuyee/panel.cgi>

Sending content

Receive and parse the request

Client

HTTP request

HTTP request

socket

http_server

E.g., URI =

<http://nplinux1.cs.nctu.edu.tw/~tzuyee/panel.cgi>

URI = <http://nplinux1.cs.nctu.edu.tw/~tzuyee/panel.cgi>

Do CGI procedure

Close socket and
Waiting for a connection

Client

http_server

panel.cgi

Waiting for a connection

http_server

Client

HTTP RESPONSE

Panel cgi's stdout

socket

panel.cgi

Client

Waiting for a connection

http_server

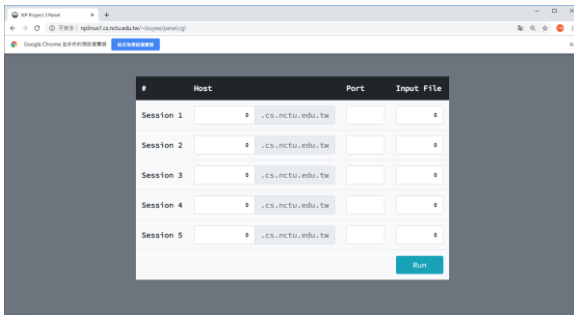

Child exit!

socket

panel.cgi

Client

Waiting for a connection

http_server

Connect to http_server

Waiting for a connection

Client

http_server

Connect to http_server

Accept, create socket

Client

socket

http_server

Sending content

Accept, create socket

Client

HTTP request

socket

http_server

E.g., URI =

<http://nplinux1.cs.nctu.edu.tw/~tzuyee/console.cgi?h0=...>

Sending content

Receive and parse the request

Client

HTTP request

HTTP request

socket

http_server

E.g., URI =

<http://nplinux1.cs.nctu.edu.tw/~tzuyee/console.cgi?h0=...>

URI = <http://nplinux1.cs.nctu.edu.tw/~tzuyee/console.cgi?h0=...>

Do CGI procedure

Client

Close socket and
Waiting for a connection

http_server

socket

console.cgi

QUERY_STRING=
h0=nplinux1&p0=1234...

Client

Waiting for a connection

t2.txt

In this project, you need to implement the green part.

Please refer to the spec for more details!
